

Young
CLIMATE
Warriors

Young Climate Warriors Climate Change Club in a Box Session 7

The climate is changing, we need to too!

HAVE your CARBON
FOOTPRINTS sparked any
conversations?

Were there any items you used /
bought last week that made you
stop and think about your
carbon footprint?

THE CLIMATE IS
CHANGING
WHY AREN'T WE?

STOP
climate change

CLIMATE EMERGENCY

What do you think of
these banners and
images?

Does anyone
know who this
is?

Let's have a look at chameleons ...

Chameleon
movie

Did you know?

- Chameleons eyes rotate separately.
- Chameleons tongues can reach twice the length of their body
- There are over 160 different types of chameleons
- Half of all chameleons are native to Madagascar.

Why do you think we have a chameleon as the Young Climate Warriors logo?

- Chameleons change colour in **response to a new situation**
- Chameleons **adapt** to the new environment in which they find themselves
- Chameleons **react to new information and tell others** about it – using their colour change as a way to communicate a message.

Chameleons can remarkably and dramatically change – can you?

Would you
like to take
action and help
solve our
climate change
problem?

Little by Little

‘Little by little, a little
becomes a lot’

Tanzanian proverb.

What do you think is the link between these
three short videos - and climate change action?

Design your own climate change banner or poster

Look at the examples from the beginning of today's Session.

Think about what might make others stop and look?

What colours will draw them in?

What catch phrase do you like best?

What images will you include?

A chameleon? A jigsaw puzzle?

Fill the jigsaw with little actions you could take to help combat climate change from your home.

Challenge for the week!

Choose **ONE** action from your jigsaw that **YOU** can take to reduce your impact on climate change this week.

Stop dripping
taps

Turn off
lights

Digital
detox

Does it really
need washing?

Adjust boiler
settings

Change your
internet search
engine

Reduce
draughts

Reduce
Shower time

Improve home
insulation

Close
outside doors

Unplug
when charged

Turn down
thermostat

Switch off
stand-by

Monitor
your
electricity usage

Limit
hairdryer use

Energy efficient
lightbulbs

Close
curtains

Only boil
what you need

Share
bathwater

Don't let your
smart TV idle

Keep your
fridge closed

Avoid your
tumbledryer

Wear another
jumper

Only wash at
30°

Consider
solar
